

**Amendments to the Drawings:**

The attached sheet of drawing sheet includes changes to Fig. 5 to insert the reference numeral 27 and the lead line on reference numeral 22 has been replaced by an arrow. This sheet also includes Fig. 6.

Attachment: Second Replacement Sheet

Annotated Sheet Showing Changes

**REMARKS**

This amendment is submitted in response to the discussion between the undersigned counsel and the Examiner during an interview conducted October 4, 2006.

A second replacement sheet is submitted herewith, containing Figures 5 and 6, in which a new reference numeral has been added, designating the solder coating 27 which covers the opening 22. In addition, the lead line from the reference numeral 22 has been deleted, and a new arrow has been inserted. These revisions are supported by the specification at paragraph [0052]; paragraph [0008], lines 5-7; and paragraph [0060], line 11.

For the reasons discussed during the interview, Applicants respectfully submit that the Aisenbrey Published Patent Application (Publication No. US 2005/0269727 A1) is not a reference against the present application, and that none of the disclosure relied on in the Office Action in respect of that application is disclosed in the parent patent (U.S. Patent No. 6,741,221), which is directed to the use of a conductive loaded resin-based material to form an antenna.

In light of the foregoing remarks, this application should be in condition for allowance, and early passage of this case to issue is respectfully requested. If there are any questions regarding this amendment or the application in general,

a telephone call to the undersigned would be appreciated since this should expedite the prosecution of the application for all concerned.

If necessary to effect a timely response, this paper should be considered as a petition for an Extension of Time sufficient to effect a timely response, and please charge any deficiency in fees or credit any overpayments to Deposit Account No. 05-1323 (Docket #056208.52613US).

Respectfully submitted,
